## PREFACE

This issue of the *Building Part of the Statistical Register of New South Wales* contains statistics for 1963-64 and earlier years.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the most recent statistics, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin*, the *Monthly Summary of Business Statistics*, and the *Quarterly Bulletin of Building Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth authorities and to others who have supplied information, often at considerable trouble.

K. Davison  
Deputy Commonwealth Statistician  
and  
Government Statistician of New South Wales

## BUILDING STATISTICS

### EXPLANATORY NOTES

#### SOURCES OF BUILDING STATISTICS

Statistics of building activity are based on:—

- (a) local government authorities' returns of building permits issued;
- (b) quarterly returns collected from contract (including speculative) builders who regularly engage in the erection of buildings;
- (c) progress reports on construction from owner-builders, i.e., persons other than recognized builders who are erecting buildings owned by themselves (principally their own homes) without the services of a contractor responsible for the whole job;
- (d) returns of building by or for governmental authorities.

#### SCOPE OF THE STATISTICS

The statistics relate to building structures, and exclude railways, roads, bridges, earthworks, water storage, and other types of construction.

Repairs and renovations are excluded because of the difficulty of obtaining satisfactory records. The statistics of building jobs approved include alterations and additions for which a building permit was issued or which were to be undertaken by or for a governmental authority; but the values of building jobs commenced, completed, and under construction include only those alterations and additions with an estimated value (when completed) of £5,000 or more.

The statistics of government building cover the whole of New South Wales. The statistics of private building approved cover that part of the State (all municipalities and the larger residential areas within shires) subject to building control by local government authorities. For private building commenced, completed, and under construction by owner-builders, the statistics are also confined to this part of the State; but for private building undertaken by other builders, the statistics cover the whole State. The statistics therefore exclude some building in rural areas.

#### DEFINITIONS

The following definitions are necessary for interpretation of the statistics:—

1. Building is classified as *Private* or *Government* according to ownership. *Government* building includes all building for Commonwealth, State, local, and semi-governmental authorities, whether carried out by private contractors or by day labour, and whether intended for use by these authorities, for rental, or for sale after completion. Building for private ownership for which finance is provided by governmental authorities is classed as *Private*.
2. *Value of Building Jobs Approved, Commenced, Completed, or Under Construction* represents the estimated value of the whole job when completed, excluding the value of the land on which the job is carried out.
3. *Value of Building Jobs Approved* is—  
for private building, the value of building permits issued by the local government authorities;  
for government building, the value of contracts let or work commenced and day labour jobs authorised by governmental authorities.
4. *Number of Houses, Flats, and other Dwellings Approved* is—  
for private building, the number of individual dwelling units covered by building permits issued by local government authorities;  
for government building, the number of individual dwelling units covered by contracts let or day labour jobs authorised by governmental authorities.
5. *Commenced*. A building is regarded as having been commenced when work on foundations has begun.
6. *Under Construction*. A building is regarded as being under construction at the end of a period if it has not been completed and work on it has not been abandoned.
7. *Value of Building Work Done* represents the estimated value of the building work actually carried out (other than on owner-builders' houses) during the period.
8. *Dwelling Units*. The numbers of houses, flats, and other dwellings are recorded in terms of separate dwelling units. Each flat in a group of flats, and each "home unit" in a group of "home units", is counted as a separate flat dwelling unit.
9. *Conversions to Flats*. The numbers of flat dwelling units that result from conversions of old buildings into flats (see page 59 for the number approved) are not included in the *numbers* of new flats. However, the *value* of flat conversions is included in the value of flat building jobs approved in all years, and in the value of flat building jobs commenced or completed from December Quarter, 1955.
10. *Temporary Dwellings* (such as garages, sheds, etc.) are not included in the number of houses, flats, or other dwellings.
11. *Newcastle Urban Area*. This area, as defined for statistical purposes, comprises the City of Newcastle and portion of the adjoining Lake Macquarie Shire.

## No. 20. Persons Engaged in Building, N.S.W., 1955 to 1964

It has not been practicable to compile quarterly statistics of the total number of persons engaged in building, because of the difficulty of obtaining information about those who are working on owner-builders' houses and those who undertake only repairs and maintenance and minor alterations and additions to existing buildings.

A further difficulty arises because of the frequent movement of men between jobs and because some (e.g., electricians and plumbers) may work on several jobs which are under construction simultaneously. To avoid as far as possible the duplication that may result, builders are asked to record on their returns the number of persons actually working on their jobs on a specified day, including those temporarily laid off on account of weather.

The figures in this table therefore relate to persons actually working on the jobs of contract (including speculative) builders, of governmental authorities which regularly engage in the erection of buildings, and of owner-builders engaged in the erection of buildings other than houses. They cover the persons working on all jobs of these builders and authorities, including repair and maintenance jobs and minor alterations and additions to existing buildings. Working principals (contractors and sub-contractors) are included as well as their employees. The figures exclude persons working on the construction of houses being built by owner-builders and those engaged on the jobs of contractors who undertake only repair and maintenance work and minor alterations and additions.
